Tie Breaking

In the event of a tie the following will be used to break ties:

80.25 will be regarded as the perfect end point for composition and the tied entry with composition closest to this score will be given preference.

If a tie still exists, a more critical determination of the microbiological scores will be made. If a tie still exists, salt content will be considered. the composition score.

Salt content should be between 1.7-2.0. For every decimal point of variation outside of this range 1/10th of a point will be deducted from
